

## The lid

**Keep all lids of the septic system accessible at all times.** Avoid covering them with mulch, dirt or any structure (garden shed, play structure, deck, etc.).

---

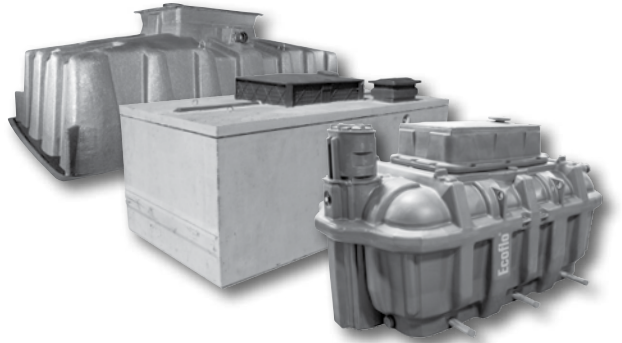

### IMPORTANT

**Failure to respect these instructions could lead, at the discretion of Premier Tech Aqua, to the warranty being deemed void and null.**

All images are for information purposes only. Please refer to the installation plan of your system to validate the actual location of the septic installation on your property.

## Landscaping

Make sure you inform all persons responsible for landscaping or maintaining your property of the location of the septic installation and of all precautions to be taken to prevent damaging the system.

## Overload

**ALWAYS** keep the covers of Ecoflo® systems free of accumulated material that could create an **excessive load** and at a **safe distance** from the following: compacted snow, backfill material, landscaping, rocks, the bottom of a slope, an embankment or a retaining wall, etc.

\*The following minimum distances apply with respect to Ecoflo® covers:

- 16' 5" (5 m) in the case of fiberglass shells
- 13' 1" (4 m) in the case of polyethylene shells
- 9' 10" (3 m) in the case of concrete shells
